**PENN POWER**

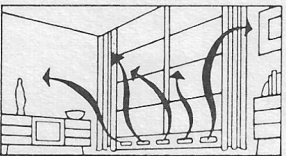

# Enjoy Total ELECTRIC Comfort

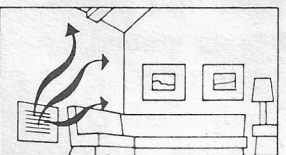

**Ceiling cable** is invisible. Wires less than  $\frac{3}{8}$ " thick are concealed within ceilings. Each room's temperature is individually controlled.

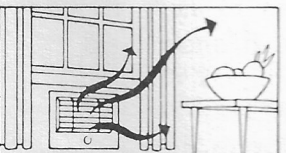

**Heat pump** heats home in winter, cools it in summer. One thermostat setting maintains any desired year-round temperature.

**Baseboard units** take up little space, permit room-by-room temperature control. Two types are available: radiant or hot water.

**Central systems** are available for either hot water or warm air heating in which flameless electric units supply the heat.

**Wall panel heaters**, with heating coils behind decorative grilles, provide radiant heat with natural or fan-forced convection.

It's only natural for you to expect amazing things from electricity! It cooks your meals, washes your dishes, heats your water, washes and dries your clothes, and does hundreds of other everyday jobs that we all take for granted. Now, Reddy can take over the job of heating and cooling your home.

Electric space conditioning is the newest, cleanest method of controlling the climate inside your home. Comfortable electric warmth in the winter and air conditioning in the summer at last make it possible for anyone to successfully defy the elements and remain cozy at home, no matter what the outside weather may be.

*Some of the advantages of electric space conditioning are:*

1. Carefree convenience — no fuel delivery, no furnace to clean.
2. Sparkling cleanliness — clean as an electric light, save cleaning and redecorating expenses.
3. Luxurious comfort — even warmth or coolness, when and where you want it.
4. Healthful — no chilly drafts or cold spots, maintains healthful humidity.
5. Truly modern — adds years-ahead value to your home.
6. Extra living space — no need for flues, chimneys or fuel storage space.
7. Long-term economy — less cleaning, less maintenance.

More and more families are enjoying these extra advantages of flameless electric home space conditioning. There are several types of electric heating which you may choose from. No matter which type is chosen, proper insulation is one of the most economical methods of achieving the utmost in draft-free comfort. In addition your home will be quieter year 'round. And, electric space conditioning can be added to your present home.

If you would like additional information, just call your nearest Penn Power office and ask for the Electric Home Heating and Air Conditioning Specialist.

## FLASH! GRANDMA'S COOKING WAS NOT THAT GREAT!

Sure we all look back fondly on the past, and grandma's cooking is one of our most pleasant memories. But you can bet that her memories are a lot different . . . like that old woodburning stove with the hot spots that scorched the food, and the hours spent waiting for the oven to heat up, and, of course, the backbreaking chore of scouring and scrubbing after each meal. Well, times change and so do grandmas. Today they treat their grandchildren to that great farm fresh cooking in fast, economical, self-cleaning electric ranges and ovens.
